## PROFESSIONAL SUMMARY

Driven Computer Science undergraduate at KL University with a solid foundation in Data Structures, OOP, and Data Analytics. Skilled in software development and data-driven systems, with hand on experience supporting team objectives. Committed to enhancing productivity and performance through detail-oriented solutions.

## EDUCATION

### KL University

B.Tech Computer Science & Engineering | CGPA: **8.95/10** 2024 – 2028  
Guntur, AP

- **Coursework:** Data Structures, OOP, DAA, DBMS, OS, CN, AI/ML, Data Analytics, Discrete Math, Linear Algebra, Digital Design, IoT

## EXPERIENCE

**ALFA INNOVATION** (WEB DEVELOPMENT) 2025 – Present  
Remote

- Collaborated with cross-functional teams to gather and analyze data for project insights.
- Assisted in the development of innovative solutions, enhancing project outcomes and team efficiency.
- Participated in brainstorming sessions, contributing creative ideas to improve product designs
- Supported project documentation by organizing and maintaining essential records and deliverables.
- Learned and applied industry standards, ensuring compliance with best practices in project execution

**Future Interns** (Data Science & Analytics Intern) 2025 – Present  
Remote

- Built predictive models with Python (Pandas, Scikit-learn); achieved 85% accuracy in churn analysis.
- Created interactive Tableau dashboards to visualize insights.

**AICTE EDUSKILLS** (Google cloud & Data Analyst) 2025 – 2026  
Remote

- Completed a virtual internship under AICTE EduSkills focused on Google Cloud and Data Analytics.
- Gained hands-on experience in cloud computing concepts, data analysis, and data visualization techniques.
- Worked with datasets to perform data cleaning, processing, and generate meaningful insights.
- Enhanced skills in Google Cloud tools, analytical thinking, and data-driven decision-making.

## PROJECTS

- **Creating Online Platform For tracking and Managing the Student Scholarship & Financial Aid)**  
Developed a web application to track and manage student scholarships and financial aid efficiently through a centralized platform. It enables students to apply for scholarships, monitor application status, and helps administrators manage eligibility, approvals, and fund distribution.
- **Designing a career guidance and Counseling platform**  
Developed a web-based platform that provides personalized career guidance, aptitude assessments, and counseling support for students. The system helps users explore career paths, receive expert recommendations, and make informed educational and professional decisions.
- **Smart Toll Gate System (IoT)**  
Developed an IoT-based Smart Toll Gate System to automate vehicle detection and toll collection, reducing manual intervention and traffic congestion. The system uses sensors and connected devices for real-time monitoring, vehicle identification, and efficient toll management.

## SKILLS

**Programming:** C, Java, Python (pandas,dataframes), HTML, CSS  
**Core:** Data Structures, OOP, DAA, DBMS, OS, CN, AI/ML, Data Analytics, IoT  
**Tools:** Git, Tableau  
**Platforms:** LeetCode, HackerRank, CodeChef, GitHub, Jira, Arduino
